-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

A. The drawings are objected to:

- a. in fig 3A, the lead line to element 124 is barely discernable.
- b. in fig 3B, the lead line to element 130 is barely discernable.
- c. in fig 3C, both elements 124 and 126 are erroneously labeled 12.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application.

Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency.

Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Also, if any formal drawings are to be submitted, it is recommended that these drawings be submitted with the Response to this Office Action to expedite the prosecution process.

Art Unit: 3611

B. The disclosure is objected to:

i. In the Spec

Beginning on p 3, "Orbitrol" appears to be a certain brand-name/trademark of a circuit. In this case, this term should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

ii. In the Claims

In Claim 4, "rociprocatable" is grammatically incorrect; "reciprocating" is a suggested amendment.

The following elements lack antecedent basis:

- In Claim 1 – effective steering pressure,
- In Claim 8 – steering pressure (first occurrence),
- In Claim 13 – steering load pressure,
- In Claim 16 – steering load.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Art Unit: 3611

3. **Claims 1-18 would be allowable** upon resolution of the objections indicated above.

Prior art does not disclose an articulated work vehicle comprising, *inter alia*,

First and second articulatable frames, and,

At least one hydraulic actuator coupled between the frames, and which increases the effective steering pressure to an elevated level when the frames are within five degrees of abutment.

4. The prior art made of record, and not relied upon, is considered pertinent to the disclosure: Sugiyama et al 5446979, Hudson 5322103, Hall 5117935, Abels 4546847, Westveer 4479349, Ahonen 4099733, Wible 4070857.
